

LIFE SAFETY & INCIDENT MANAGEMENT

ESTMobile™

Cloud-based Remote Panel Access Solution

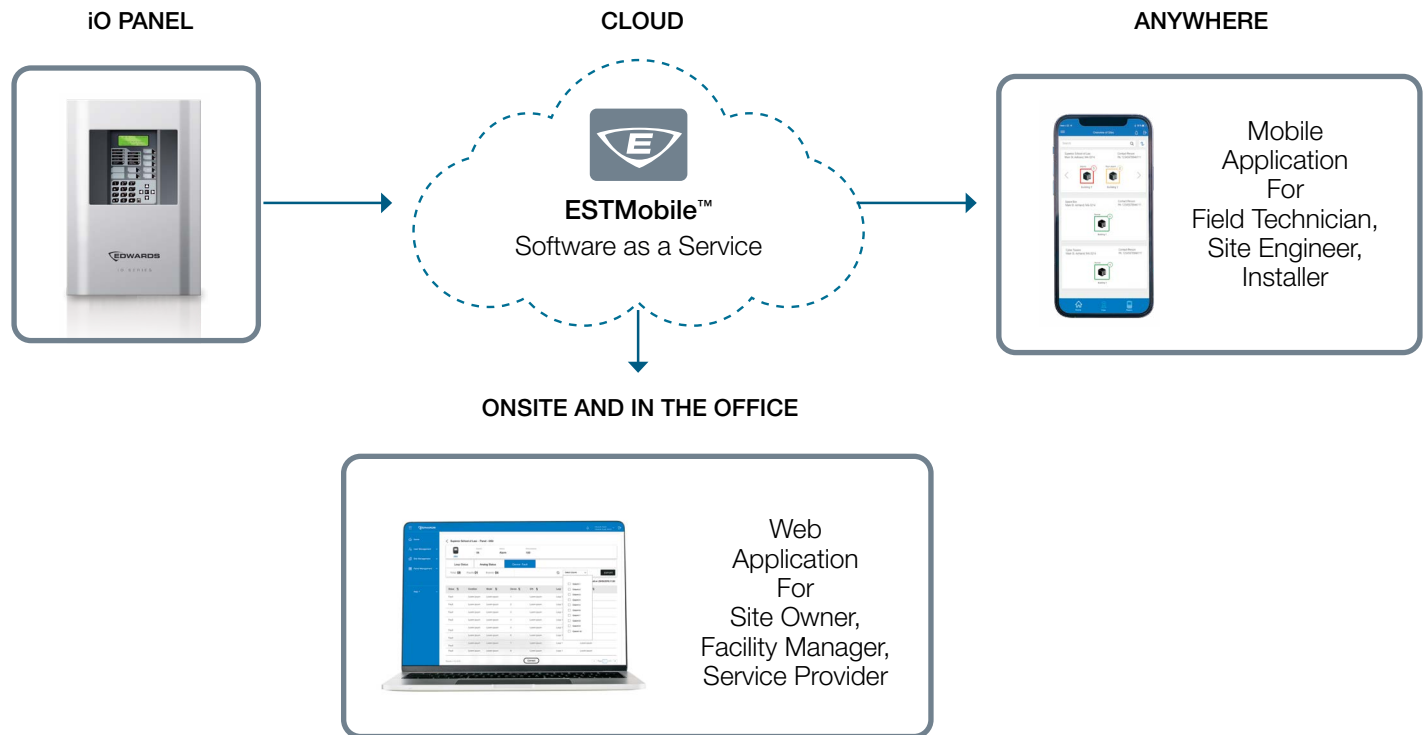

Overview

ESTMobile™ is a Software as a Service (SaaS) productivity solution allowing service providers to remotely connect to their fire control panels through a secure connection. The solution provides access reports and diagnostics from a browser-based client as well as from a smart phone or a tablet. The solution also proactively sends mobile notifications and emails about panel's events, such as alarms and other supervisory and trouble events. ESTMobile is a powerful productivity tool that is designed to provide insight and foresight into fire control panels to improve responsiveness, predict service needs, reduce service cost, and improve customer satisfaction.

Standard Features

The following features are available on the browser-based client as well as the mobile application:

- Application Dashboard that provides a view of all sites, buildings, and panels in one place
- Mobile and email event push notifications including, Alarm, Supervisory, Trouble, and Monitor
- Access to panel's reports, including Sensitivity, Status, History, and Walk Test
- Access to diagnostics, including Loop status and mapping, Analog status, and Device Fault
- Push notifications for changes in application configurations
- Multiple user types including admin, technician, and building owner
- Building owner access to event notifications
- Admin Application Configuration:
 - Add sites, buildings, panels and users
 - Assign users to panels and much more
